

## **Le dictionnaire phraséodidactique : sa place dans la didactique de la phraséologie**

The phraseodidactic dictionary: its place in the teaching-learning of frozen expressions

M<sup>a</sup> Isabel González-Rey

**Abstract:** The present study examines the role of the phraseodidactic dictionary in the teaching of idioms in foreign languages, particularly with respect to French as a foreign language. As a sub-genre of Didactic Lexicology, the phraseodidactic dictionary claims its place of honour as a prime tool in the teaching-learning methods of frozen expressions (Wotjak 2005). In response to this request, the method *PHRASEOTEXT – Le Français Idiomatique*, published in DVD format in 2015, is presented as an example of a method designed from its phraseodidactic dictionary, the PHRASEOTEXT dictionary; and in this method, phraseographical information is the aim of didactic resources.

**Key words:** phraseology, phraseodidactics, didactic dictionary, didactic lexicology.
